

OFFLINE CODING SYSTEMS TRAINING

KBA-Metronic udaFORMAXX Range

**Courses
available for:**

udaFORMAXX + CIJ
udaFORMAXX + TIJ / TT
udaFORMAXX only

udaFORMAXX Operator Training

Choose from a range of training courses that will help you get the best return on investment from your KBA-Metronic offline coding system.

Operator Training Courses

Hands-on, practical operator training protects your machinery investment, ensuring that your operators always use good working practices and that your equipment is used to best advantage.

This is normally a 1-day course. Content can be tailored to your specific application and print requirements.

Refresher Training

This ½ day course is ideal for reminding your operators of best working practices, for helping to set up new product lines and ensuring that your equipment is being used efficiently.

Exclusive UK and Ireland Distributor

	udaFORMAXX and printer integration
	Message creation
	Adjustments and configuration
	Changing cartridge / ribbon

Your choice of training location

Most of our udaFORMAXX operator training is delivered at customer-site to ensure that we train the maximum number of operators. However, you can also choose to use PrintSafe's training facility.

All courses are delivered by a KBA-Metronic trained engineer and include practical, hands-on learning.

Delegates receive a training manual and attendance certificate.
